

## Appetizers

### **Plate Boundary Nachos** \$10

--Make a brochure of the different types of plate boundaries we learned in class. Give a real-life example of each. Explain why the certain type of plate boundary creates each landforms.

### **Instagram Hot Wings** \$8

--Create a mock webpage, Instagram or Facebook post about what you think is the COOLEST part of this geology unit in 7th grade. Include a totally awesome picture with captions and hashtags that are totally lit.

### **Earth Layer Bean Dip** \$6

--Draw a picture of the earth and its layers. Explain which layer is the most dense and why. What material is each layer composed?

### **Artichoke and Rock Spread** \$6

--"Rocks are alive on a billion year time scale." Use what you know about the rock cycle to write 2 paragraphs to either defend or reject this statement.

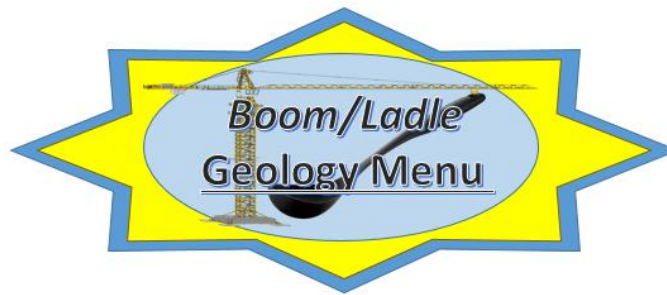

### **Rock Cycle Salad** \$12

--Make a video about a topic related to geology and/or the rock cycle.

### **Scrapbook Soup** \$15

--Create a scrapbook for the Earth's upcoming 4.8 billionth birthday. Include major events and tectonic activity throughout the Earth's history.

**All guests have a \$50 gift card they must spend.**

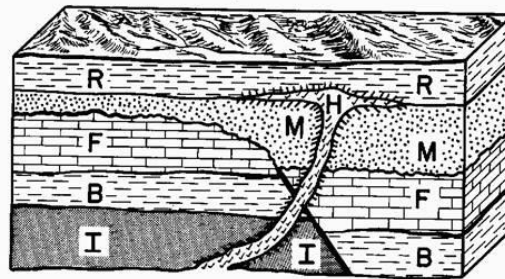

## Entrees

### **Energy Solutions Chicken** \$15

--Radioactive waste is active for 4 billion years. What design considerations would a waste management company have to consider before building a radioactive waste storage facility.

### **Interplanetary Beef** \$25

--How do planetary scientists figure out the composition of other planets? Give three possible ways and explain why those ways would work.

### **Stratigraphy Stroganoff** \$17

--Which layers/events happened first? Which layers/events happened last? Create a detailed list for the image and include every letter in the image.

### **Vegetarian Earth** \$20

--Create a News report or newspaper that highlights some of the most dangerous and destructive geological processes. Make sure you explain why they are dangerous or destructive to the average local citizen. Include a geology advertisement.

## Drinks

### **Earth on the Rocks** \$4

--You are an alien. You are going to take over Earth, you have found ways of controlling the rock cycle. How will you take over Earth using the rock cycle?

### **Rock Hard Lemonade** \$2

--Make a comic about who would win in an epic geology showdown-Sediment Girl, Metamorphic Man, or Captain Igneous? Be sure to explain why.

### **Sodas of the Future** \$5

--Based on what you know about how Utah has changed, what might it look like 100 million years into the future?

## Desserts

### **Geologic Cheesecake** \$5

--Summarize a chapter related to geology in the iScience textbook.

### **Slice of Song or Poem Pie** \$5

--Compose a song or poem about rocks and the rock cycle.

### **Chocolate Kahoot!** \$8

--Make a Kahoot! about the evidences for the Plate Boundaries.

### **Earth a la Mode** \$10

--Create a scale model of the layers of earth. Examples include creating a model out of clay, baking a cake, making a poster, etc.
